

Project Engineer (f/m)

Ref.-No. RI-07/19

RI Research Instruments is a modern, expanding, globally operating engineering and manufacturing enterprise with about 180 employees. Our engineers, physicists and manufacturing specialists are engaged in the production of innovative components and systems for particle acceleration and further applications in basic science, energy and medical technology, as well as industry.

For our group Superconducting RF, Cryogenics and Special Manufacturing Projects we are looking for a project engineer (f/m) in our company in Bergisch Gladbach (near Cologne).

Your future tasks

- Design and lay out of the mechanical components in close collaboration with the design and project team
- Define work procedures on basis of customer specification, workshop drawings and the special quality requirements of the project in close collaboration with the project management and manufacturing specialists
- Select, place orders and control qualified subcontractors
- Monitor and control technical progress and time schedule of the respective projects
- Support project management in preparation of offers, especially in reviewing the technical specification in view of technical risk and feasibility and preparing the cost calculation

Your qualifications

- Master or Bachelor degree in mechanical engineering or similar course of study like industrial engineering or process engineering
- Good knowledge with MS-office and preferably knowledge with established scheduling, presentation and controlling tools, respectively ERP-systems
- Fluency in English
- Highly motivated, team oriented, proactive and structured method of work
- Willingness to travel for customer and supplier visits

What we offer

- Diversified, fascinating and challenging tasks
- A dynamic work environment with exceptional projects
- Performance-linked wages and continuing education opportunities
- Flexible working time schemes for a better balance of work and family life
- Team work with open communication and flat hierarchies
- Good access both by car and public transport (Technologiepark Bergisch Gladbach, near A4 exit Moitzfeld)
- Health promotion with various offers like e-bikes, back training and yoga classes

Have we sparked your interest?

We are looking forward to receiving your complete application including a letter of motivation, your CV, certificates, and references as well as information your earliest possible date of entry and your salary requirements.

Please email your application to our HR office.
