

Project Manager/Project Engineer for our Accelerator Business

Ref.-No. RI-62/21

RI Research Instruments is a modern, expanding, globally operating engineering and manufacturing enterprise with about more than 270 employees. Our engineers, physicists and manufacturing specialists are engaged in the production of innovative components and systems for particle acceleration and further applications in basic science, energy and medical technology, as well as industry.

To support our steady growth, we are currently looking for Project Managers and Project Engineers (m/f/d) in our business groups for superconducting or room temperature rf technology-based projects.

Your future tasks

- Manage project tasks for our accelerator technology projects and the comprehensive supervision of our special projects with high demands on quality and technology
- Coordinate technical, time-related, and logistic aspects for the project with our technical experts, customers, and subcontractors
- Define and control technical progress and time schedule of the project
- Support preparation of offering components or systems answering technically complex call for tenders under consideration of technical risk and feasibility

What we offer

- Diversified, fascinating and challenging tasks
- A dynamic work environment with exceptional projects
- Performance-linked wages and continuing education opportunities
- Flexible working time schemes for a better balance of work and family life
- Team work with open communication and flat hierarchies
- Good access both by car and public transport
- Health promotion with various offers like e-bikes, back training and yoga classes

Your qualifications

- PhD, Master or Bachelor degree in mechanical or rf engineering or similar course of study, like industrial engineering or process engineering
- Demonstrated experience in (international) projects for prototype or single-piece-production
- Languages: English and German, fluent
- Good knowledge with MS-office and preferably knowledge with established scheduling, presentation, and controlling tools
- Highly motivated, team oriented, initiative and structured method of work

Have we sparked your interest?

We are looking forward to receiving your complete application including a letter of motivation, your CV, certificates, and references as well as information your earliest possible date of entry and your salary requirements.

Please email your application to our HR office.
